

Forticlient VPN Setup

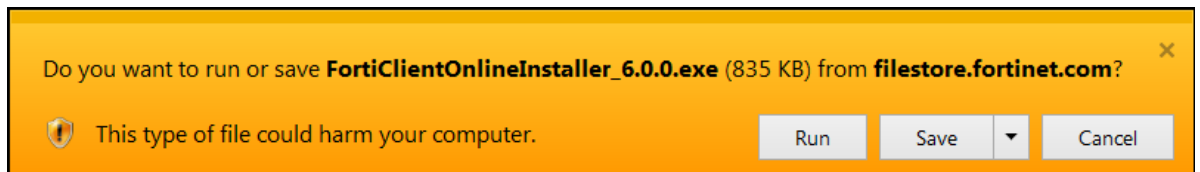

Initial Setup

All users will need to go through this first time setup to install the Forticlient on their laptop.

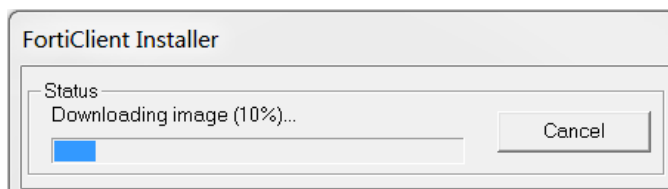

1. Go to <https://www.forticlient.com/downloads>
2. Windows will already be selected, click Download

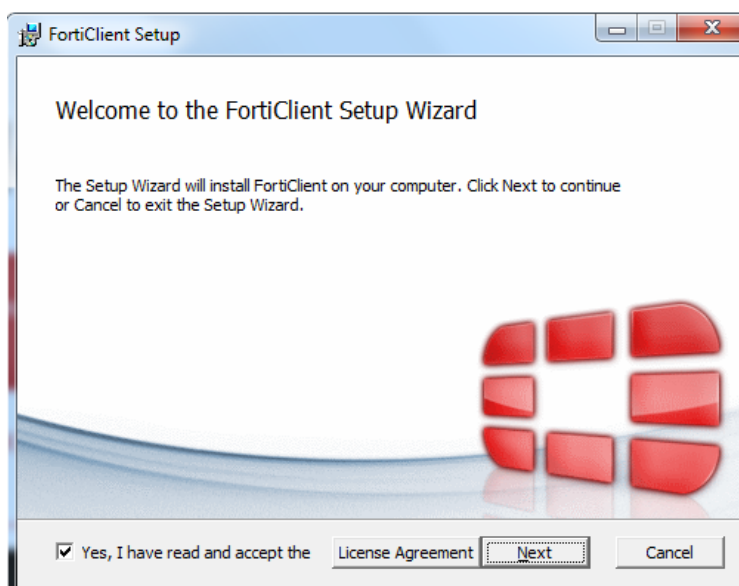

3. Internet Explorer will prompt to Run / Save ; Click Run

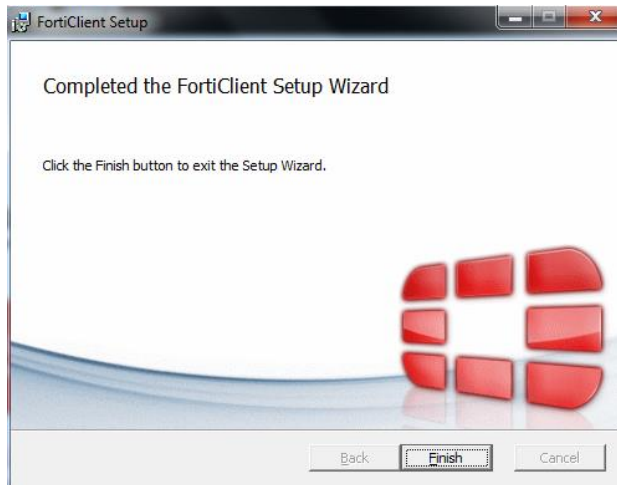

4. The Installer will download the latest client

5. You must accept the License Agreement by clicking the "Yes, I have read and accept", then click Next

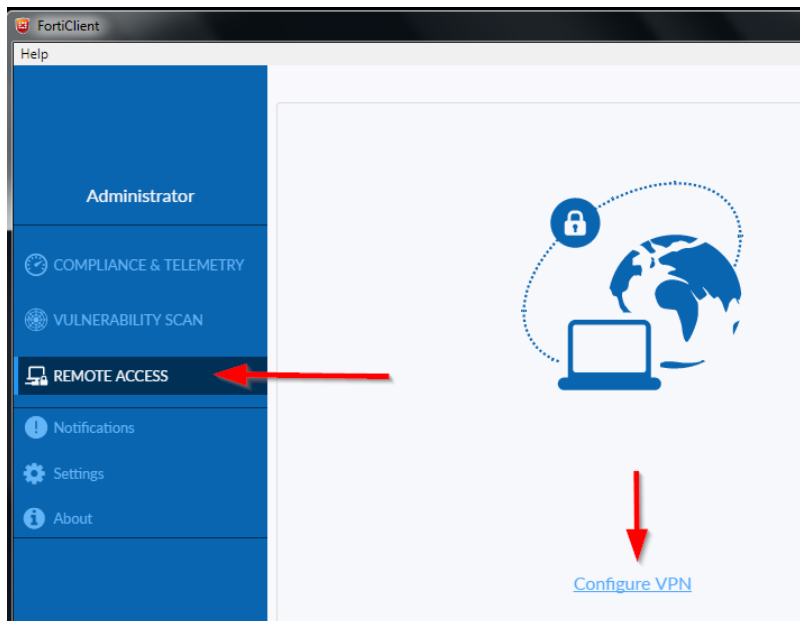

6. Leave the default settings and click “Next” until you see the “Install” screen. Click “Install”. Click the “Finish” button when the install completes.

7. **Restart your computer after you finish installation.**

8. After restarting your PC, locate the desktop shortcut  and open the application.
9. On the left side of the application click “REMOTE ACCESS”, and then click “Configure VPN”

10. Enter the fields as shown in the image and click "Save":
