

Instrumentation & Controls Technician

City Brewing Company, a leading contract manufacturer in the beverage industry, has an immediate opening for an Instrumentation & Controls Technician at our La Crosse, WI facility. This position requires a high level of technical competence and ability to grow the competitive capabilities of the Company.

Essential Duties include, but are not limited to:

- Calibration, installation and verification of instrumentation systems.
- PLC and HMI programming.
- Set up and operate tests and collect data.
- Build, troubleshoot and repair electronic circuits.
- Maintain equipment tracking / calibration database.
- Review and evaluate existing and new processes, and conduct field measurements.

Additional Duties and Responsibilities:

- Develop and improve manufacturing methods for production. This may include the selection, specification or machinery design/redesign to achieve the stated objective. It may also mean changes of production methods.
- Interface with vendors and bring knowledge and experience into the manufacturing practice when and where applicable.

Qualifications:

- Associate Degree in electronics or equivalent job related or military experience. Manufacturing experience (food or beverage preferred) totaling 4-8 years desirable.
- Be fully capable of troubleshooting and repairing PLC systems. Candidates with Rockwell CLX, SLC500, and PLC5, experience are preferred.
- Candidates must have prior experience with operator interfaces and be capable of troubleshooting those systems. Experience in A-B Panel-View, Panel-View+, Factory Talk SE, ME, and Studio software.
- Experience with logic diagrams, instrumentation installation details, piping and instrument diagrams, motor control schematics, specifications, and cost estimating is desired.
- Experience with loop controller, regulators, transducers, recorders, process controls, pressure transmitters, flow transmitters, temperature transmitters, pneumatic, control valves is desired.
- Experience in A-B servo programming and controls, especially knowledge in Sercos control and Kinetix Servo Controllers.
- Must be able to work effectively in a team environment with minimal supervision.
- Proven problem-solving ability.
- Ability to prioritize and multi-task under continuously changing business priorities.
- Proficient in Microsoft Office software (Word, Excel, Outlook).
- Strong mathematical / analytical skills.
- Possess strong communication and presentation skills.
- Willingness to work overtime when required.
