### Essential Duties and Responsibilities include:

- Applications Support
  - Coordinate system bugs/enhancement/upgrade requests with vendors, customers, and internal users assisting with specification, testing and implementation
  - Assist in defining requirements for user & internal requests
  - User Administration
  - Troubleshooting application issues related to software, database, or data
  - Report writing and support
  - Review daily system and data integrity audits
  - Use standard coding techniques, source control and change control

### Qualifications:

- Programming and Administration Skills
  - MS Visual Studio & ASP.NET(or the equivalent in Java / object oriented languages)
  - MS SQL Server – database fundamentals
  - MS Access
  - SQL Reporting Services desired
- Analytical Skills
  - Effective troubleshooting skills
  - Ability to research, learn and adapt quickly
  - Strong attention to detail
- Written/Oral Communication Skills
  - Ability to document and present technical requirements to team members and end users
  - Ability to effectively communicate project status
  - Communicate regular updates to team members
- A 2-year degree in Computer Science or related field is required; Bachelor's Degree preferred
- 1 to 3 years' on-the-job experience with the above described preferred
- Prior manufacturing experience highly desired
